

## Thursday Class – Using built in Web Camera

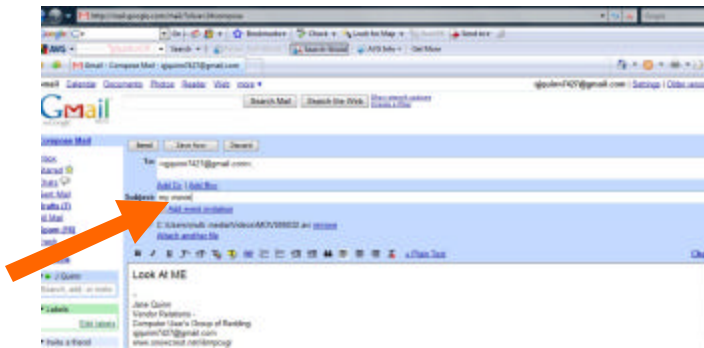

1. Start your camera software
2. Click on the icon to making a movie ( WE all have different software . My icon looks

like a movie camera. When I click it , it starts recording. I click the STOP icon to end the recording

## Thursday Class – Using built in Web Camera

3. My CAMERA software automatically saves the movie as an AVI filetype in my VIDEOS folder.
4. I will open Vista Movie Maker. Import this video. Insert a Title Text, Publish the movie as an Email. It will be saved as a .WMV filetype. I will make sure it's in the VIDEOS folder so I can locate it to attach to my email msg.
5. Last step I will create an email message and

Thursday Class – Using built in Web Camera

attach it .
